

We are looking now in **Romania** for

Test Engineer

Driver assistance systems and driving dynamics functions

- ▶ **Type of contract:** Full-time
- ▶ **Sector:** Automotive industry Highly competitive benefits
- ▶ Highly competitive benefits
- ▶ Possibility to work from home

Area of responsibility:

- You carry out FNT-Syntax specified test lists to verify the requirements of the vehicle dynamics software.
- You are also responsible for tests - in other words, you run them, analyze them and finally also evaluate the results. If are deviations are present, you will document them and find appropriate solutions if problems arise.
- As a test engineer, you will be responsible for evaluating the customer and system requirements within the functional development of our customer and deriving test specifications from them.
- You define component and system tests on various test instances (HiL, SiL, MiL, vehicle) and also carry out these independently
- As part of the approval process, you support function and model development as well as test management and application with your technical input and initiate error messages and change requests.

Profile:

- Completed degree with a focus on vehicle technology, electrical engineering, mechatronics or a comparable field of study
- First experience in the areas of test methodology, test tools and test environment (preferably in the automotive industry)
- First experiences with Matlab / Simulink, VBA or Python
- Good analytical thinking and abstraction, fast perception and a high sense of responsibility
- Teamwork and customer orientation
- Comprehensive understanding of mechanics and software
- Experience in working with Python is desirable
- Comprehensive understanding of vehicle dynamics software is desirable
- German language is mandatory, English language is a high advantage

We offer it:

With us, you will benefit of many advantages, including flexible working hours, motivating salary, employee events to strengthen the team, private medical insurance plus a variety of personal development opportunities.

Formel D is the global service provider of the automotive industry. We develop market- leading concepts as well as individual, scalable solutions along the entire automotive value chain – from the development to the production and up to the aftersales service.
