Computer skills	Programming ▪ C, C++, DBase, Assembler, Pascal, Visual Basic, Borland Delphi, HTML, Java, JavaScript, CSS, XML, XSL Operating systems ▪ Windows 3.11/95/98/2000/NT/XP/Vista/7/8,10,11, Dos, Unix, Linux Pachete software ▪ Microsoft Office (Word, Excel, PowerPoint, Access, FrontPage, Publisher) Graphics and Design ▪ Corel Draw, Photo-Paint, SPICE, Macromedia Director, Macromedia Flash CAD ▪ Autocad, AutoCAD Inventor, Trimble Sketch-up ▪ Additive manufacturing Slicing software ▪ Virtual and Augmented reality generation software ▪ E-learning platforms (e.g. Moodle)
Research skills	▪ Throughout my work, I coordinated students from BSc and MSc programmes for Student Scientific Communication Workshops, some of whom were awarded by the Evaluation Commissions. The scientific research activity is based largely on continuing doctoral and postdoctoral studies. Research experience has been gained also by being a Research Director and Managing Director for the Research Development and Innovation CAMIS center within University Politehnica of Bucharest (www.camis.pub.ro). Thus, my main concern is the application of information technology to industrial processes, as part of the Industry 4.0 related concepts, especially for quality control of products and processes and their automation and additive manufacturing technologies. The publishing activity consists of the presentation of some original results, some of which are successfully applied in the industry (automatic detection of bone fragments in the food industry - algorithms based on image processing and artificial intelligence applied to radiographic images of the controlled product - system built and marketed by Spectral Ltd. in the United Kingdom) and various research findings in the field of 3D printing. Within the research activity I have always made a sustained effort to obtain and realize research / development / innovation contracts through various competitions. I coordinated as project director 6 international research-development-innovation projects, 4 research projects with national funding and more than 10 projects as project responsible. I also participated as an expert in several research contracts with national or international funding. Fields of research and interest include: ▪ Additive Manufacturing ▪ Techniques of Artificial Intelligence applied to industrial engineering ▪ Radiographic imaging and image processing ▪ CAD / CAM systems; computer assisted manufacturing ▪ Augmented and Virtual Reality ▪ Automation of production systems ▪ Automation of quality and material quality evaluation processes
